

Screening  
saves lives.

## No-Cost Colonoscopy

### Early Detection

- » Ninety percent of people whose colorectal cancer is found at an early stage are alive five years after diagnosis.

### Prevention

- » During a colonoscopy, the provider can remove precancerous polyps before they turn into cancer.

For more information, call  
701.780.6533 or visit

4	\$72,900

- » You are uninsured or underinsured.
- » You have never been screened or are past due for colorectal screening.
- » You are a North Dakota or Minnesota resident.

*“It was a day out of my life that has now saved my life. I’m very grateful I went in when I did. I was a healthy 50-year-old with no unusual symptoms. No wonder colon cancer is sometimes referred to as the ‘silent killer.’”*

- Terry Harmon, Altru patient

*This program is made possible through Altru Health Foundation.*
