

Airbrush Spray Tan Instructions

Before Your Appointment

To ensure that you obtain the maximum benefit from your spray tan, it is important that you shower, shave, and exfoliate your body before your appointment. Do not apply any lotions, deodorant or make-up. We recommend wearing loose fitting clothing to your appointment- this is to ensure that the application of your tan stays even as it is absorbed. A light bronzer is applied with the spray tanning solution to assist your technician in providing you with an even, glowing tan. Although the bronzer does not stain, we recommend wearing dark colored clothing to your appointment, as this bronzer is transferable. You will immediately notice a natural looking tan which will continue to develop over the next eight hours. We recommend to not get your skin wet, sweat, or do any strenuous activities for at least 10 hours after application. Some of the initial bronzer will wash off in the shower- do not be alarmed- this is part of the tanning process. Application of a moisturizer after that initial shower, and daily over the next week, will prolong the life of your spray tan. Spray tans do not offer any UV protection from the sun's harmful rays so sunscreen will still need to be applied if you plan on spending time outdoors! We offer single spray tans as well as packages!

Important Advice

Skin: If you feel you have highly sensitive skin, or have any doubts, we recommend a small localized test spray to check your skin compatibility before having your airbrush spray tan.

Finally if you want your airbrush spray tan to last longer then you should avoid:

- » Long baths
- » Hot spas
- » Extended swimming sessions
- » Any products that exfoliate the skin
